ADMISSION RATES - ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES - 1944, 1945, 1946

CURRENT TRENDS
Week Ending 2 Mar 1946

The annual admission rate per 1000 for All Causes is 747, marking a 10.5% increase over last week's rate of 676. It exceeds the rate of 730 reported for the corresponding period a year ago. All but the 6th, 9th, 12th, and 13th Districts show increases; these increases range from 2.1% for the 3rd District with a rate of 588, to 44.0% for the Potomac and Severn River Commands with a rate of 638. On the other hand, the decreases are relatively small, except for the 12th District whose rate of 495 is 17.4% below the one reported last week. The 5th District with a rate of 1188 leads all the others, while the 7th District with 384 is at the bottom.

The combined rate of 224.3 for all Respiratory Diseases is a slight increase over last week's rate of 214.0 which was the lowest reported so far this year; the rate a year ago was 253. Notwithstanding this apparent stability, the rates within the Districts show considerable fluctuations from the past week. Thus, the 4th and 5th Districts and the Potomac and Severn River Commands register increases of over 40%, the greatest being in the 4th District whose rate of 183.6 is 53.5% greater than its rate of 119.6 for the preceding week. Next come the Potomac and Severn River Commands and the 5th District, whose rates of 118.6 and 420.9, respectively, as against 81.7 and 297.0 the week before, mark increases of 45.2% and 41.7% over the latter. The 7th and 8th Districts have more moderate increases. Maximum decrease is in the 13th District with a rate of 136.3 which is 39.2% lower than its rate of 224.2 for the preceding week; it is followed by the 12th District with 138.2, a decrease of 31.1% from last week, and the 1st District whose rate dropped 21.1%. The 7th District is still lowest, but the 5th District has now taken the lead from the 9th District.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 136.3 marks a very slight rise from last week's rate of 132.5, but continues to compare rather favorably with the rate of a year ago. Important improvements over last week are shown by the 1st, 12th, and 13th Districts with drops ranging from 29% to 43%; however, the diseases show gains ranging from 41% for the 5th District and the Potomac and Severn River Commands, to nearly 68% for the 4th District. The 5th District leads all the others with a rate of 280.4, while the 7th District is lowest with 34.6.

PNEUMONIA, BRONCHO AND LOBAR. With a combined rate of 1.8, these two diseases show nearly a 44% improvement over last week's figure of 3.2; it also compares very favorably with the value of 5.0 reported a year ago. The improvement is general except for the 1st and 6th Districts. The 9th District is still highest with 4.2, though this rate marks an approximate 46% drop from the previous week. The 4th, 7th, 8th, and 13th Districts, as well as the Potomac and Severn River Commands, report no incidence.

PNEUMONIA, ATYPICAL. Unlike the preceding, this disease with a rate of 4.9 reaches the maximum attained so far this year. The value was 2.1 last week, and 2.0 a year ago. All Districts show gains except the 4th District which reported no incidence, and the 13th District whose rate dropped 50%. Most significant gains are shown by the 6th and 11th Districts, the latter lying at the top with 14.8.

TONSILLITIS AND PHARYNGITIS, ACUTE. The combined rate of 81.3 exceeds the value of 80.5 reported two weeks ago, and which was the highest since the beginning of the year. It still lies just below the figure of 84.0 reported a year ago. Gains of over 50% are shown by the 8th District and the Potomac and Severn River Commands, while the 4th, 5th, and 7th Districts have gains nearly approaching that percentage. The 9th District, with a minor increase placing its rate at 158.8, still leads. All other Districts show decreases. The largest, nearly 31%, being registered by the 13th District as its rate falls to 46.3. In spite of its gain, the rate of 32.3 for the Potomac and Severn River Commands is still the lowest again this week.

SCARLET FEVER. For the third week, this disease is on the increase, the rate this week being 22.4 as against 16.0 last week and 14.3 the week before. These rates still compare favorably, however, with the corresponding ones reported a year ago. Most outstanding are the rates for the 5th, 9th, and 11th Districts, with respective values of 43.3, 76.0, and 33.1; the 9th District leads, while the 5th District shows the most significant gain as it tripled its rate of 14.3 for last week. Rates for the other Districts have little that is remarkable. The 6th and 7th Districts report no incidence.

CEREBROSPINAL FEVER, MENINGOCOCCIC. The rate for this disease goes up to 0.5 from 0.2 last week. Chief contribution is from the 9th District with a rate of 2.1; the 11th District had two incidences, while the 5th and 12th Districts each had one.

MEASLES. This disease keeps on climbing steadily; its rate this week is 14.1 as against 13.4 last week, and 9.1 the week before; it is 40% over the rate of a year ago. The 6th District has the most significant improvement, its rate of 12.3 being less than half the one for the previous week. On the other hand, the disease made further noteworthy gains in the 5th and 9th Districts, the latter topping all others with a rate of 36.2. The 4th District reports no incidence.
